3. When it is demonstrated that factors associated with processes and waste generation are fundamentally different from those considered in assignment of a complexity designation, the administrative authority, on a case-by-case basis, may assign a minor facility a different complexity designation than that indicated in LAC 33:IX.1319. In making such a reassignment the administrative authority shall consider:

D. Potential Public Health Points

1. Determine if the receiving water is used for a municipal water supply.

2. Review the complexity designation assigned in LAC 33:IX.1311.A. If groups I or II were assigned, check the first complexity designation blank, record 0 points in the public health points blank and go to the next instruction.

3. If a higher complexity designation (III, IV, V, or VI) was assigned, then a determination if the receiving water is used as a drinking water supply source must be made. To qualify for points under this criterion, either the receiving water to which wastewater is discharged or a water body to which the receiving water is tributary must be used as a drinking water supply source within 50 miles downstream.

4. Check the appropriate complexity designation blank and record associated points in the public health points blank.

E. Major/Minor Facility Designation

1. Determine if the facility has been designated a major facility by the administrative authority. If the answer is YES, then check the appropriate blank and assign 25 points. If the answer is NO, then proceed to the next part.

2. Determine if the permitted effluent limitations assigned were based on water quality factors in the receiving water. Check the appropriate answer and assign the points required.

F. Total Rating Points. Sum the rating points assigned to each of the six sections and record the total in the total rating points blank.
